

Business challenges

Paper-based Work Permit Issuance

Decentralized Work View

Complex Approval Process

Lack of Communication

Impact

Time-consuming Approval Process

Reduced Productivity and Coordination

Worker Endangerment

Features

- Customizable role/function-based approval process
- Customizable templates for job safety analysis and risk assessment
- Adaptive workflows allow organizations to make customized workflows in the application
- Mobility enabled approvals allowing authorities to act on the go
- Real-time permit tracking
- Automate workflow for job authorizations and approvals

Solution

A smart solution that automates the work permit approval process with an emphasis on safety and reliability.

Cherrywork Permit to Work

#WorkGetsDone

Cherrywork Permit to Work helps create and manage work permits to authorize jobs that involve hazards at a work site. The application identifies potential hazards, supports necessary preparation for the job, ensures safe operation, and improves communication among teams.

It works in tandem with SAP PM Work Clearance Management to regulate and monitor workplace safety procedures.

Benefits

- Issue work permit in a hassle-free and easy manner
- Track issued work permits efficiently
- Build transparent communication between applicant and approval team
- Enable safe work execution of projects
- Ensure adherence to safety policies and standards
- Eliminate, minimize, or mitigate operational risk
