

Viatrix empowers people worldwide to live healthier at every stage of life. The company provides access to medicines, advance sustainable operations, develop innovative solutions and leverage their collective expertise to improve patient health.

Business Challenges

Paper-based, time consuming process of calibration

Lack of timely alerts and notifications to the users

Cherrywork® Intelligent Maintenance and Operations

Solution

- Work order management for work order/job queue, TECO, time confirmation, release and close work order
- Create, search & view notifications including Maintenance Request, Activity Report, Malfunction Reports..

Outcome

- Spare parts search with component information
- Reports for plant compliance, work orders, equipment and labor hours
- Mobile application with geospatial capabilities for employee and plant equipment
- User friendly dashboard with visibility of work orders, spare parts and reports
