

## Business Challenges

Manage safe maintenance operations

Inefficient maintenance rounds

Realtime condition monitoring

Lack of offline operations capability

## Impact

Reduced productivity due to manual processes

Higher MTTR due to lack of real-time data availability

## Features

- Intuitive UI/UX for employees to manage and track maintenance notifications & orders in real-time
- Intuitive dynamic resource scheduling to track maintenance work orders
- Picklist and spares management made efficient and transparent
- Integrated work permits provides complete transparency and timely approvals to conduct safe activities with zero accidents and near miss events
- Detailed reporting and analytics of maintenance operations and spares KPIs
- Seamless data integration with SAP ECC & S/4 systems

## Solution

A comprehensive maintenance operations management solution to empower business users to manage end to end operations with an intuitive UX for ease in adaptability and brings in intelligence to reduce overall MTTR and improve digital productivity of the team

## How IMO transforms your organization

**#WorkGetsDone**

Cherrywork Intelligent Maintenance and Operations enables intelligence in efficient end to end maintenance operations, **on field digital worker enablement**. With **intuitive resource scheduling**, efficient spares management and integrated permit management Cherrywork IMO empowers your team with higher safety and more efficient operations.

## Benefits

- 15-20 % reduction in MTTR by providing the right information to the right stakeholder at the right time
- 30% higher productivity by eliminating manual data
- Shortened fulfillment times of spares for the maintenance
- Improved productivity of the technicians in maintenance rounds
- 0% accidents and near miss events
- Condition monitoring and predictive maintenance capabilities to reduce the maintenance costs and improved asset health
