Business Challenges

- Managing warehouse space
- Complex workflows
- Order pick & putaway inefficiencies & inaccuracy
- Lack of real-time stock visibility for sales forecast

Impact

- Productivity loss due to manual processes
- Lost business opportunity due to lack of visibility

Features

- Intuitive UI/UX for employees to manage and track orders in real-time
- Barcode scanning to support inbound and outbound operations
- Digital inbound inspections to ensure zero defect
- Efficient bin-to-bin & SLOC to SLOC transfer
- Putaway management for receiving goods from vendors and putting them in the respective bins/SLOCs
- Configurable workflow for rapid approval and validation
- Detailed reporting and analytics of inventory and warehouse operations
- Seamless data integration with SAP ECC & S/4 systems

Solution

A comprehensive warehouse management mobile solution that drives material flow through the warehouse efficiently, ensuring the right material is placed in the right bin and picked efficiently.

How Smart Warehouse transforms your organization

#WorkGetsDone

Cherrywork Smart Warehouse is a **scalable, and flexible** warehouse management mobile application that **efficiently manages and controls high-volume warehouse operations** to boost productivity, lower costs, shorten fulfilment times, and increase customer satisfaction at an optimal ROI.

Benefits

- Manage warehouse capacity by optimal putaway management
- Save time and eliminate manual data entry with barcode scanning, OCR & voice-to-text capability
- Shortened fulfillment times and increased customer satisfaction
- Smarter decision making by gaining access to demand forecasting
- Easier audit compliance and management
