

Customer is an energy technology company headquartered in Houston, U.S.A. It provides solutions for energy and industrial customers worldwide, with a diverse portfolio of equipment and service capabilities including oil well drilling, formation evaluation, completion and production.

## Business Challenges

Inconsistent inventory tracking

Warehouse efficiency

Managing warehouse space

Inventory loss

## Cherrywork Smart Warehouse

### Solution

- To implement a mobile application which consumes the SAP BTP SDK for android for inventory and warehouse management processes
- The solution provides add-on feature of barcode scanning and label printing to improve accuracy of transactions and reduce picking errors. Implemented the following processes through mobile and web-based solutions

### Outcome

- 20% reduced turnaround time
- 360° visibility of inventory
- 20% effective utilization of warehouse space
- Improved employee productivity
- Improve order fulfillment
