Solution

Intelligent Work Management helps individuals or teams organize, track, and prioritize their work tasks and projects with built-in SAP and Non-SAP system integrations.

How Intelligent Work Management transforms your organization

#WorkGetsDone

- Intelligent Work Management is a work and task management tool that begins by seamlessly integrating with your organization's systems and importing your business partners such as employees, vendors, and suppliers.
- IWM can be leveraged to build new business applications faster to cater to the organizational needs.
- Once integrated, Intelligent Work Management focuses on improving process automation by using chatbots, insights to action, and customized workflows.
- Following task automation, Intelligent Work Management helps improve strategic and operational efficiency through process automation using predictive analysis, configurable dashboards, and workflow visualization.

Benefits

- Automate existing processes & get quicker TAT by 40%
- Reduce application build time by upto 50%
- Increase in productivity of workforce by at least 10% to 20%
- Cross functional collaboration made simple
- Improved organizational quality and consistency
- Business intelligence to help with organizational strategy
