

SI Group is a global leader in the innovative technology of performance additives, process solutions, active pharmaceutical ingredients, and chemical

Business Challenge

Customer is in pharma industry, and they often create multiple materials together to create one specific Product (medicines) It is highly complex and often difficult to track all the material creations together to achieve the product launch successfully.

Material Master Data

Solution

We have "Project concept" one of the Cherrywork MDM features which was perfect fit for the client requirement. Where multiple materials can be created and tracked under one single request, which is called as a Project.

Business Benefits

3X reduction in process cycle time
40% Savings due to digitalization

Outcome

Post implementation, SI Group could use the project concept for the planned Project Launches where multiple materials need to be created together. And Now with this feature – its quite easy to track/monitor all the material creations together under one request, one reference.
