

## AI-Powered Intake Experiences from Demand to Delivery

- AI powered orchestration for smart, seamless routing.
- Automated workflow and smart task orchestration

- Unified Intake layer to submit all requests
- Real- time dashboards for visibility and control
- Seamless ERP integration for unified insights.

Cherrywork Intake Management helps you understand the context behind every request, enabling faster, smarter decisions that align with strategic priorities and compliance standards. From demand to fulfillment, orchestrate each step with agility, transparency, and built-in intelligence .

## The Key Features

- Unified Intake layer to submit all requests.
- AI powered orchestration for smart, seamless routing.
- Automated workflow and smart task orchestration.
- Real- time dashboards for visibility and control.
- Seamless ERP integration for unified insights.

## Why move to Intake Management?

- Disconnected request processes slow down decision-making.
- Manual approvals introduce risk, errors, and delays.
- Lack of visibility leads to missed SLAs and compliance gaps.
- Operational teams spend too much time on status tracking.

Cherrywork intake management solution centralizes intake, turning fragmented workflows into structured, automated processes that deliver results.

## Why Cherrywork Intake management portal?

- Unified intake layer with one interface—no backend complexity.
- AI- Powered Orchestration to route and prioritize requests automatically, also to improve accuracy and user experience
- Automated approval workflows and Intelligent task management
- End-to-end transparency with real time dashboards tracking cycle time and spend insights.
- Seamless integration with SAP ECC, S/4 HANA, SAP Ariba and other ERP systems.

## 200+ Purpose built intake templates to drive enterprise efficiency
