

# Custom Weigh and Custom Dispense

## Weigh & Dispense On Different Operations

- Material quantity measured as provided from the weigh machine through shop floor integration .
- ✦ Actual consumption possible during a later dispensing operation.

## Data visibility

- ✦ Data visible in a single view in the form of tables and carousels.
- ✦ Easily access key information such as material specifications, quantities, unit of measure, status.

## Material usability

- ✦ Status clearly indicates whether a material is eligible for dispensing.
- ✦ Helps operators to maintain traceability throughout the dispensing.

## Time Sensitive Calculation For Material To Be Consumed

- ✦ Check-out/Check-in functionality provides capability to calculate time sensitivity.
- ✦ Useful for tracking time-sensitive or environmentally sensitive materials.

## Option to log details while Dispensing.

- Allows operators to enter comments or observations at the time of dispensing.

## Integration with the shop-floor.

- ✦ Integration provides real time values.
- ✦ Can monitor progress instantly, and any discrepancies or delays can be addressed proactively.
