

Downtime Plugin

Log Downtime Quickly On A Single Click Via POD

- Log resource downtime instantly with a single click through POD.
- ✦ Ensuring fast, accurate tracking of stoppages to improve response and reporting.

Quick Glance Visibility into Downtime Data

- ✦ Provides a view of all recorded downtime events.
- ✦ It includes details like start & end times, duration, reason code, resource, operator details etc.

Assign reason codes for the downtimes

- ✦ Assign downtime reason codes to categorize and track causes of production stops.
- ✦ Helps analyzing and reducing downtime effectively.

Quick Downtime logging with reason codes

- ✦ Easy and quick downtime logging for a resource with capability to assign reason code.
- ✦ Quick view of downtime history.

Downtime Duration Tracking

- Automatically calculates and displays the duration of each downtime event.

Real-Time Downtime Updates from POD Operator

- ✦ POD operators log scheduled and unscheduled events in real time.
- ✦ Quick action by supervisors and maintenance teams.
