

## Visual Quality Inspection Plugin

## Standardized Visual Inspection and Non-Conformance Tracking

The Visual Inspection and NC Logging Plugin addresses the challenge of inconsistent defect detection and undocumented non-conformances. By guiding operators through standardized visual inspection steps and logging inspection results and NCs. The plugin enables supervisors to ensure quality compliance, identify recurring issues, and maintain complete, ready quality records.

### Key Modules & Capabilities

#### ■ Guided Visual Inspection

Supports operators in performing consistent and accurate visual checks on different operations of the sfc's both automatically and manually.

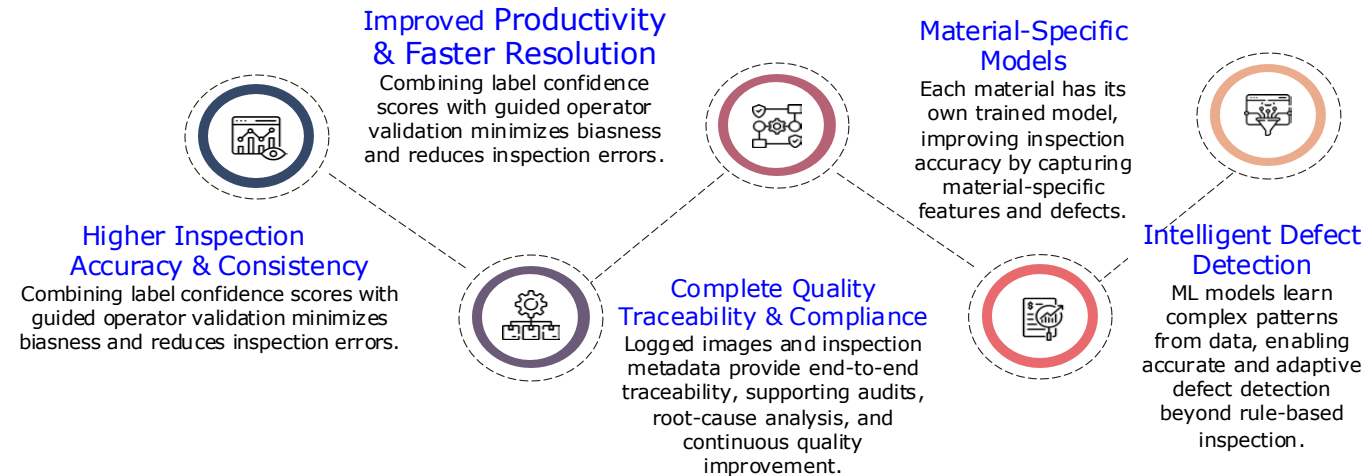

#### ■ Admin Configuration screen

Enables standardized NC code assignment to detected labels, mapping of materials to their corresponding trained models and configuration of camera destinations to the control key in the admin configuration.

#### ■ Inspection Data Logging

Automatically records inspection images along with label confidence values and assigned NC codes, creating a reliable and auditable inspection record.

### Core Advantages

## Elevate Your Digital Manufacturing with Visual Quality Inspection Plugin

Discover how Visual Quality Inspection Plugin enhances Visual Inspection and NC Logging by using trained ML models. Contact us to schedule a demo and get Visual Quality Inspection for your SAP Digital Manufacturing.
