

Cherrywork AI Invoice Management

Cherrywork® AI Invoice Management is an AI-first, cloud-based solution that automates and digitizes invoice operations end-to-end. It captures invoices from any source, enables touchless processing, and delivers real-time visibility across the invoice lifecycle.

The Key Features

- Capture and extract invoice data from multiple sources using AI-powered Data Extraction.
- Enable suppliers to submit invoices and track status through a self-service portal.
- Validate invoice data in real time and detect discrepancies to reduce risk.
- Automate processing of non-PO invoices with rule-based coding.
- Ensure secure access with role-based controls and segregation of duties.
- Automatically post invoices into SAP systems with minimal manual effort.
- Track invoice status, SLAs, and performance through real-time dashboards.
- Store and manage invoice documents in a centralized repository.
- Resolve invoice queries quickly using AI-powered chatbot support.

Benefits

- 85% lower processing costs with AI-driven automation.
- Higher accuracy and efficiency through high STP workflows.
- Faster cycle times with end-to-end automation.
- 62% improvement in on-time vendor payments.
- Faster go-live with SAP and multi-ERP integration.
- Full compliance with global e-invoicing mandates

Proven Business Impact

- **85%** reduction in price per invoice.
- **67%** reduction in FTE.
- **4X** increase in processed invoices.
- **62%** increase in on time vendor payments.
