

AI Invoice Management

Automate your invoice lifecycle, end-to-end.

An AI-first, cloud solution built for SAP environments that digitizes invoice capture, enables touchless processing, and delivers real-time visibility across the invoice lifecycle; posting to a clean core with AI-powered extraction, not OCR templates.

Business Problems it Solves

- Manual, error-prone data entry across scattered invoice sources
- Slow approval cycles and missed early-payment discounts
- No real-time visibility into invoice status, SLAs & aging
- Costly headcount tied up in low-value AP processing
- Compliance gaps against global e-invoicing mandates

Incture®

Top Key Features

- **AI Capture & Extraction** - Proprietary DEE reads any source & format — no templates
- **Real-Time Validation & Fraud** - Validates data live and flags discrepancies to cut risk
- **Non-PO Automation** - Rule-based coding & routing for non-PO invoices
- **SAP Auto-Posting** - Posts straight into SAP with minimal manual effort
- **Analytics & Dashboards** - Track status, SLAs, aging & performance in real time
