

AI Invoice Management

Payables Simplified

Cherrywork® AI Invoice Management is an AI-first, cloud based accounts payable (AP) solution that automates and digitizes invoice operations end to-end. It captures invoices from any source, enables touchless processing, and delivers real-time visibility across the invoice lifecycle.

Built on Business AI Platform

Middle East & North Africa Beverage Manufacturing Co.

Trusted by global enterprises to automate millions of invoices every year

Business Problems it Solves

- Manual, error-prone data entry across scattered invoice sources
- Slow approval cycles and missed early-payment discounts
- No real-time visibility into invoice status, SLAs and aging
- Costly headcount tied up in low-value AP processing
- Compliance gaps against global e-invoicing mandates

Incture®

Top Key Features

- Capture and extract invoice data from multiple sources using AI-powered Document Extraction Engine (DEE)
- Automate line-level cross-validation against POs, Goods Receipts, and contract terms to prevent financial leakage
- AI-recommended GL coding suggestions for Non-PO invoices based on historical data
- Enable straight-through processing with real-time bi-directional SAP integration, and automated posting of approved invoices to SAP
- Track processing bottlenecks, vendor performance, SLAs, and cash flow through real-time dashboards
- Resolve AP queries 24/7 with an intelligent conversational agent
- Integrate with leading e-invoicing tools for compliant, cross-border invoicing
