cherrywork

Cherrywork CheckList Form Designer

Reads any DOCX or PDF form template and generates a ready-to-use digital form with AI. It links forms to plant objects, sends them to users on schedule, and routes them for approval and trend analysis to keep GMP records audit-ready.

Features

- AI Form Generation
- Low-Code Form Designer
- Object Linking to Plant Assets
- Workflow and Scheduling
- Trend Analytics
- Digital Signatures and Audit Trail

Business Challenges

- Hundreds of paper and Word/PDF forms
- Slow, costly manual form digitization
- Periodic checks missed without prompts
- Manual review and sign-off delays
- Delayed batch release
- Readings sitting on paper
- Trends across batches and equipment unseen

1

Upload

Upload any DOCX or PDF form template: checklist, log sheet, inspection or cleaning record.

2

Generate

AI extracts sections, fields, input types and limits, and drafts the digital form for review.

3

Link & Schedule

Link the approved form to equipment, material or work center and set its trigger or interval.

4

Collect & Analyze

Users fill and sign on any device, approvers review, and trend charts track every submission.

VALUE DELIVERED

AI-Generated Digital Forms

Minutes, Not Days

Any existing template becomes a reviewed digital form without manual build.

Always On Time

Scheduled workflows assign each form and escalate overdue checks.

Trends, Not Binders

Values from every submission are charted across batches and equipment.
